

When is the Town due to review its Strategic Plan?

Answer provided by CAO:

The decision to complete a new or update the existing strategic plan is a decision entirely within the purview of Council. However, staff's advice is that this should be one of the first things that the new Council should undertake, probably within the January – March 2019 timeframe. It is a good exercise for a new Council to undertake and it identifies early in the term what Council hopes to achieve within not only its term but within a 5-10 year timeframe.

How many homes are expected to be built over the next four years?

Answer provided by Town Planner

The Town is anticipating approximately 150 homes/year to be constructed over the next 4 years.

What is the life cycle of sewage plant and the water plant?

Answer provided by Director of Public Works

Based on the growth of 150 homes per year it is anticipated that the planning process will start in 2022 for the Wastewater Plant with construction complete by 2027, and the Water Plant is one year behind with planning starting in 2022 and completion of upgrades in 2028.
