NOTICE OF STUDY COMPLETION

MUNICIPAL CLASS ENVIRONMENTAL ASSESSMENT FOR REPLACEMENT OF THE CENTRAL BRIDGE

The Town of Carleton Place has completed a Class Environmental Assessment study to address structural deficiencies and load capacity issues on Central Bridge and other related works including consideration for additional pedestrian facilities and repairs to Gillies Bridge, and modifications to the Mill Street Bridge further to the east to accommodate planned redevelopment on McArthur Island. In addition to the bridge requirements, consideration was also given to relocation of municipal services (i.e. watermain) as required.

The Town has planned this project under **Schedule 'C'** of the *Municipal Class Environmental Assessment (October 2000, amended in 2007, 2011 & 2015)*. As such, public and technical agency consultation played a key role in developing the study recommendations.

An Environmental Study Report (ESR) documenting the planning process undertaken, details of the study recommendations as well as potential impacts and mitigation measures, has been completed and by this Notice is being placed in the public record for review. Subject to comments received as a result of this Notice and the receipt of approvals, the Town intends to proceed with construction of the recommended projects as outlined in the ESR.

The ESR is available for review on the Town's website (www.carletonplace.ca) and at the Carleton Place Town Hall (175 Bridge Street) during regular hours of operation Monday to Friday. Further information may be obtained from one of the following members of the project team:
